

**SIEMENS**

**Fusible General Duty Safety Switch / Interrupteur de sécurité général avec fusible** Type VBII  
**Cat. No. / N° de cat. GF325NA** Type 1  
**Maximum 400 Amps / 400A** Maximum 240 Volts AC (V~) / Maximum 240 Volts c.a. (V~)  
**Indoor** Maximum 250 Volts DC (V=) / Maximum 250 Volts c.c. (V=)

Suitable for use as Service Equipment in the USA. / Peut être utilisé comme appareil de branchement aux É.-U.

Horsepower Ratings Puissance nominale en HP	240 VAC <sup>1</sup> V c.a. <sup>1</sup> 1Ø	240 VAC V c.a. 3Ø	250 VDC <sup>1</sup> V c.c. <sup>1</sup>
Std. HP (Std. Fuse) <sup>2</sup> / standard (fusible standard) <sup>2</sup>	—	50	50
Max. HP (Time Delay) / maximale (fusible à retard)	—	125 <sup>7</sup>	—

Continuous load current not to exceed 80% of the rating of fuses employed in other than motor circuits. / Le courant de charge continue ne doit pas dépasser 80% de la valeur nominale des fusibles utilisés ailleurs que dans les circuits d'alimentation du moteur.

**Fuse and Short Circuit Information / Fusibles et courts-circuits**  
 When used with Class K fuses, Class H fuses or a UL Listed Circuit Breaker rated for 10,000 amperes, RMS symmetrical, 240 volts maximum, this switch is suitable for use on a circuit capable of delivering not more than 10,000 amperes, RMS symmetrical, 240 volts maximum.

When used with Class R fuses and Class R fuse clip kit **HR65A** properly installed, this switch is suitable for use on a circuit capable of delivering not more than 100,000 amperes, RMS symmetrical, 240 volts maximum.

When used with Class J fuses with the load base relocated to the "J Fuse" position marked on the enclosure this switch is suitable for use on a circuit capable of delivering not more than 100,000 amperes, RMS symmetrical, 240 volts maximum.

When used with Class T fuses and Class T fuse adaptor kit **HT25A** properly installed, this switch is suitable for use on a circuit capable of delivering not more than 100,000 amperes, RMS symmetrical, 240 volts maximum.

**Danger** – Unless class R, J or T fuses are used, this switch may present a risk of fire and injury to persons if installed on circuits capable of delivering more than 10,000 amperes, RMS symmetrical.

When used with fuses marked with DC ratings, this switch is suitable for use on a circuit capable of delivering not more than the DC interrupting rating marked on the fuse, at the DC voltage rating marked on the fuse, up to a maximum of 10,000 amperes, 250 volts DC.

**Danger** – Unless fuses marked for an interrupting rating of 10,000 amperes at 250 volts DC are used, this switch may present a risk of fire and injury to persons if installed on circuits capable of delivering more than 10,000 amperes.

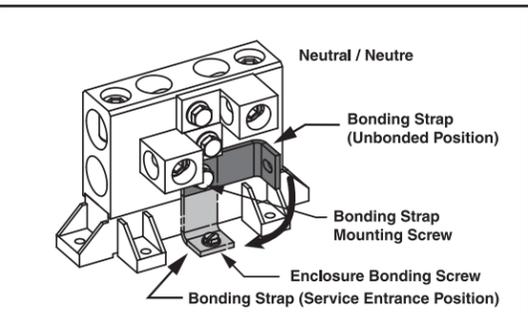

When installing fuses, fully insert fuse to bottom of fuse clip, ensuring the fuse blade has cleared the top lip of the fuse clip.

Renewable link fuses are not recommended in the USA. Renewable link fuses are not permitted in Canada.  
 Les fusibles à fil renouvelables ne sont pas recommandés aux É.-U. Les fusibles à fil renouvelables ne sont pas autorisés au Canada.

**USE 75°C COPPER OR ALUMINUM WIRE  
 UTILISER DES CONDUCTEURS 75°C EN CUIVRE OU EN ALUMINIUM**

**Terminal & Wire Information / Bornes et conducteurs**

Description	Wire Range Calibre des fils	Wire Tightening Torque Couple de serrage des fils	Lug Mounting Torque Couple de serrage des cosses
Line, Load & Main Neutral Secteur, charge et neutre secteur	(1) 1/0 AWG - 600 kcmil (2) 1/0 AWG - 500 kcmil	275 lb-ins. / lb-po	—
Service Ground Terre	(2) 6 AWG - 300 kcmil	275 lb-ins. / lb-po	80 lb-ins. / lb-po

- To bond neutral to enclosure:**  
 1) Remove Bonding Strap Mounting Screw  
 2) Rotate Bonding Strap to Service Entrance Position shown  
 3) Install Bonding Strap Mounting Screw and torque to 35 lb-ins.  
 4) Install Enclosure Bonding Screw and torque to 35 lb-ins.

**Patents Pending / Brevets en instance**  
<sup>1</sup> Use outer two poles. / Utiliser les deux pôles extérieurs.  
<sup>4</sup> The starting current of motors more than the standard horsepower or kilowatt ratings may require the use of fuses with appropriate time delay characteristics. / Des fusibles ayant les caractéristiques de retard voulues peuvent être nécessaires pour le courant d'amorçage des moteurs de puissance nominale supérieure à la puissance standard.  
<sup>7</sup> Not for use as a motor controller over 74.6 kW (100 hp). / Ne pas utiliser comme contrôleur de moteur de plus de 74.6 kW (100 hp).

For questions on this device please call 1-800-241-4453. / Pour obtenir plus d'information sur cet appareil, composez le 1-800-241-4453.

For installation by a qualified person, in accordance with all electrical codes and/or the National Electrical Code ®. / Installation par une personne qualifiée, conformément à tous les codes de l'électricité et/ou au NEC (National Electrical CodeMD) (É.-U.).  
**Important:** Do not allow petroleum based (hydrocarbon) sprays, chemicals, solvents or any paint to contact interior components. Petroleum based chemicals can cause degradation of electrical insulating materials.  
**Important:** Ne pas mettre des aérosols à base de pétrole (hydrocarbures), des produits chimiques, des solvants ou de la peinture en contact avec les composants internes. Les produits chimiques à base de pétrole peuvent provoquer la dégradation des matériaux isolants électriques.
