To whom it may concern,

The Murray brand of circuit breakers is being phased out and replaced by equivalent Siemens products. All Murray Meter Combo Load Centers, EQ Small Circuit Load Centers, and Rock Solid Load Centers manufactured after January 2002 may use Siemens brand circuit breakers. Siemens brand circuit breakers are UL listed for use with the Murray products manufactured after that date. The following page contains a cross reference table with the equivalent Murray product types to Siemens.

For Murray products manufactured prior to January 2002, please refer to the wiring diagram affixed to the inside of the door of the loadcenter for the specific breaker types that are approved for that panel.

For further questions, please contact your local Siemens sales representative.

With kind regards,
